

myNeighborhood Census Viewer | Overview

The myNeighborhood Census Viewer provides the ability to interactively report on published census data in the City of Boston.

The viewer features a map depicting Boston and its various communities.

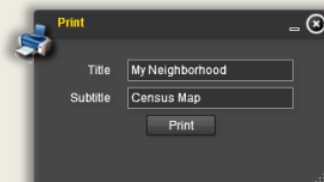

The myCensus Data widget provides the tools necessary to interact with the census data presented on the map.

Tools are accessed from the toolbar in the upper right corner of the widget.

Tools include the ability to select census blocks, chart the data, view the data, and download the data.

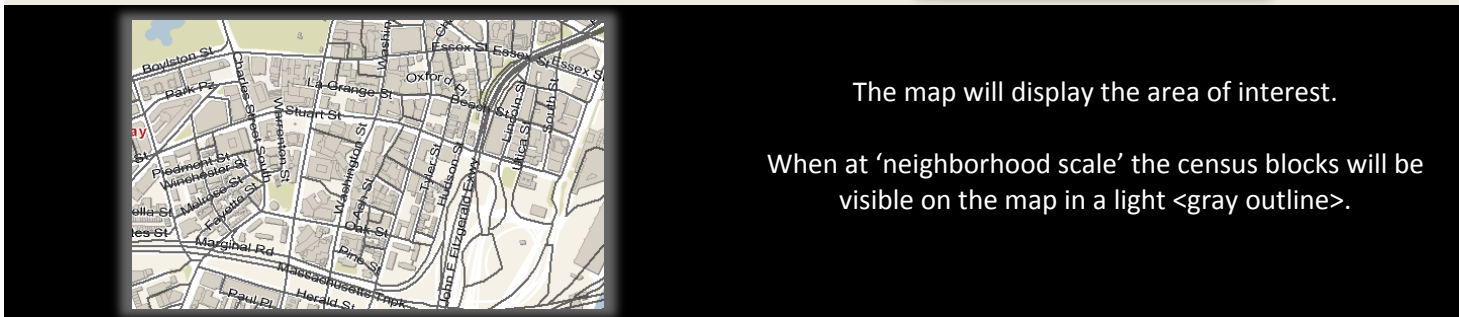

The Print Widget provides simple printing capabilities.

Continue with *Getting Started* to learn more about using the myNeighborhood Census Viewer.

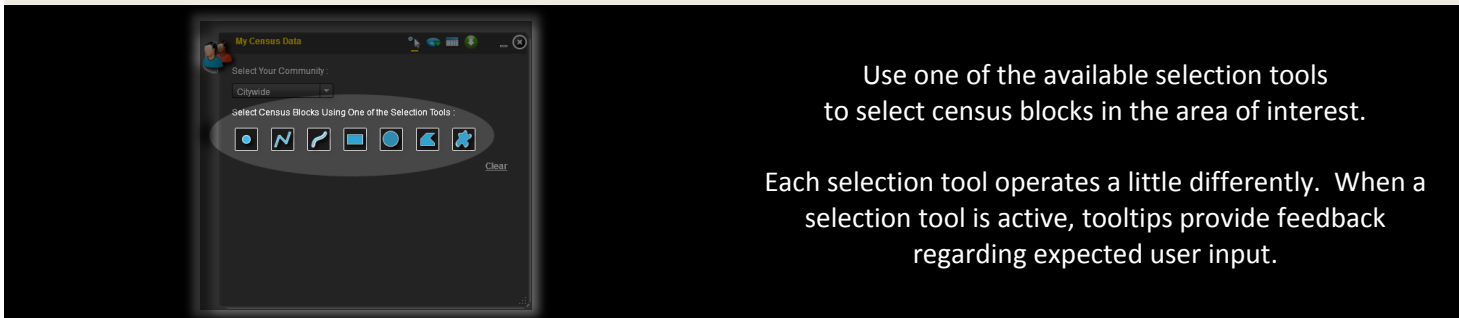

myNeighborhood Census Viewer | Getting Started

To get started, select an area of interest from the community dropdown menu of the myCensus Data Widget.

You may further refine your location using the navigation widget.

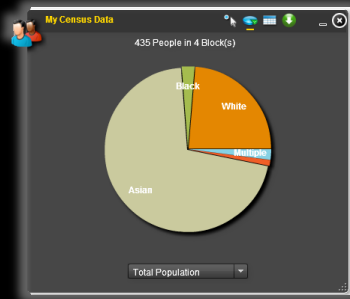

You may also navigate the map using the mouse:
click and drag to pan the map or
use the mouse wheel to zoom in/out.

A vertical navigation widget. At the top is a circular compass with a blue arrow pointing up. Below it is a vertical slider with a white handle. At the bottom is a small square button with a yellow location pin icon.

After making your selection, the selected census blocks will be highlighted on the map.

Note that census data is provided at the block level. It is not possible to select areas smaller than the census block.

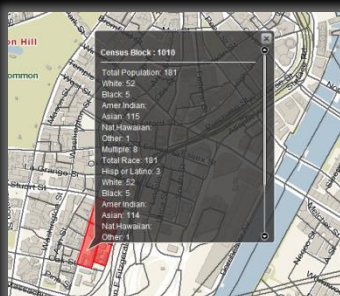

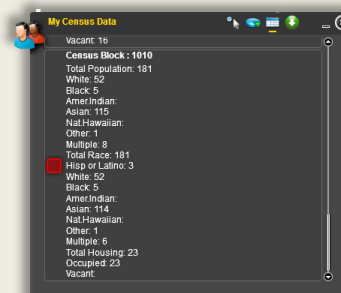

After making your selection, the chart provides summary reports for the selected census blocks.

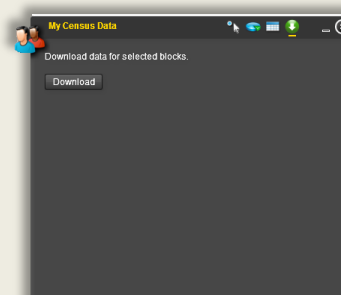

Use the dropdown under the chart to switch between available summaries.

The myCensus Data Widget also provides the ability to view detailed census data for each selected census block.

You may also view detailed data for census blocks by clicking directly on a selected block on the map.

You may also download detailed census data for the selected blocks. The data will be downloaded in 'CSV' format, which is readily opened in Microsoft Excel.
